

Road Traffic Safety Management System

ISO 39001: 2012

ISO 39001: 2012

ISO 39001:2012 specifies requirements for a road traffic safety (RTS) management system to enable an organization that interacts with the road traffic system to reduce death and serious injuries related to road traffic crashes which it can influence. The benefits of implementing ISO 3900:

- Reduction in potential accidents
- Reduction in actual accidents
- Reduction in risk of legal action
- Reduction in insurance claims
- Improved social responsibility credentials

ISO 39001: 2012 – RTSMS Awareness Session

1 day
